Business volumes and increased engagement enable growth with an improved risk profile

Building a sizable and profitable franchise

Banco CTT Strategy Update

The logo for Banco CTT, featuring the lowercase letters 'ctt' in white on a red, tilted rectangular background.

ctt

BCTT was launched in 2016, focusing on simple, competitive, retail banking, by leveraging CTT historical network and brand

banco**ctt**

A recognized and well trusted brand

Simple and low-cost product offer, that is easy to understand and operate

Always nearby, combining **efficient physical channels**, with nationwide coverage, and **digital distribution platform**

Ecosystem with seamless integration for partners, providing platform to offer third party products

Sizable, high potential franchise...

- **700,000 clients** (625,000 current accounts), 65% Lisbon/Porto metro areas
- **Average age 45 years**, strong digital adoption
- **Social profile aligned with Portuguese mass-market** (e.g. average monthly salary ~1,300 €)

...With positive feedback and self-generated promotion

- **80% of customer base highly satisfied** with BCTT offer
- **+40 Net Promoter Score**, consistently TOP 3 player
- **Consistent account opening, word of mouth based**

+700,000 clients in 7 years

Last 12 months have been particularly eventful, bringing increased focus on “BCTT franchise earning power”

Sea change in monetary context...

(Euribor 12 months rates)

New monetary context translates directly into more earning power, particularly on “classical balance sheet business”...

...Bringing increased alignment with BCTT core aptitude for savings (as with most postal banks)

New partnership (and shareholder) fully supportive of enhanced focus on BCTT franchise, by building a distinctive bancassurance platform (Universo partnership, mainly off-franchise, to terminate in december '23)

TRAN
QUILI
DADE

...And changes in core partnerships

New partnership with Generali already engaged, leveraging BCTT historical track-record on savings

Given this context, strategy update increases focus on BCTT franchise, while doubling down investment on its key platforms

1

Monetize customer base

Increase engagement, deepening banking relationships

2

Excel in savings

Leverage new Generali partnership and CTT legacy as savings platform

3

Grow selectively on credit

Focus on “on-franchise” consumer finance and mortgage

Same 3 “growth themes”, but with emphasis on franchise-based business (especially savings), while moderating credit growth (Universo discontinuation and auto-loans stabilization)

A

Digital platform

Transform digital channels, with increased sales features and migration into cloud-based model

B

Human platform (branch network)

Increase level of specialization, with more dedicated staff and improved branch design

Double-down investments on key platforms, enabling faster franchise monetization

Taking the value ladder...

The following years

1st years

- **Branch network and tech platforms setup**, product launch, market communication
- **Focus on account opening, initial product penetration**

Current state

- **700,000 clients onboarded, high potential profile**
- **Opportunity to increase product penetration¹**
 - ~50% of customer base already with significant product penetration (of which 80% with salary domiciliation and/or direct debits)
 - ~50% with limited usage

- **Increased focus on “value per client” and product penetration:** on/off balance sheet savings, mortgages, personal loans, insurances, salary domiciliation
- **Effort to be leveraged on more proactive commercial force, CRM tools and self-service digital platforms**
- **Franchise to continue to grow** (~4k monthly net adds)

2 Room to significantly increase franchise volumes, particularly on savings

Client engagement with room to increase... ..Leading to expressive volume growth

Client engagement benchmark¹
(measured as total resources per client, Euros)

Room to progressively converge client engagement towards incumbent's levels

BCTT's total client's resources
(On/off balance, Bn euros)

Execution to be founded on 3 main levers

Price attacker stance, both on current account commissions and deposits (made possible with streamlined operation and branch network synergies)

Complete product line, leveraging core partnership with Generali (one of the largest insurance players in Europe)

Reinforced operating model, with new digital and human platforms (detailed ahead)

¹ Internal BCTT estimate based on market knowledge and bank's account reports; considers mass-market segment, excluding affluent and private banking clients

2 Recent countercyclical execution shows BCTT potential, already under new monetary context

Commercial operation well geared towards new era, with resurgent “fight for deposits”

Market lost more than 4% of deposits during 1st semester 2023 (-7.5 Bn €), while BCTT increased its stock by more than 6%

¹ Based on Banco de Portugal report on “depósitos e equiparados de particulares”

Unrivalled execution in auto loans...

...Moderating pace going forward

Going forward, significant balance sheet de-risk
(Universo termination) **and a more selective approach to credit growth**

Consumer finance with stabilized footprint in auto-loans, focusing growth on franchise penetration (e.g. recently launched fully digital process for BCTT clients)

Mortgage with renewed ambition, but dependent on market conditions/profitability

A This strategy implies a significant upgrade on digital platforms, bringing BCTT to market best practices

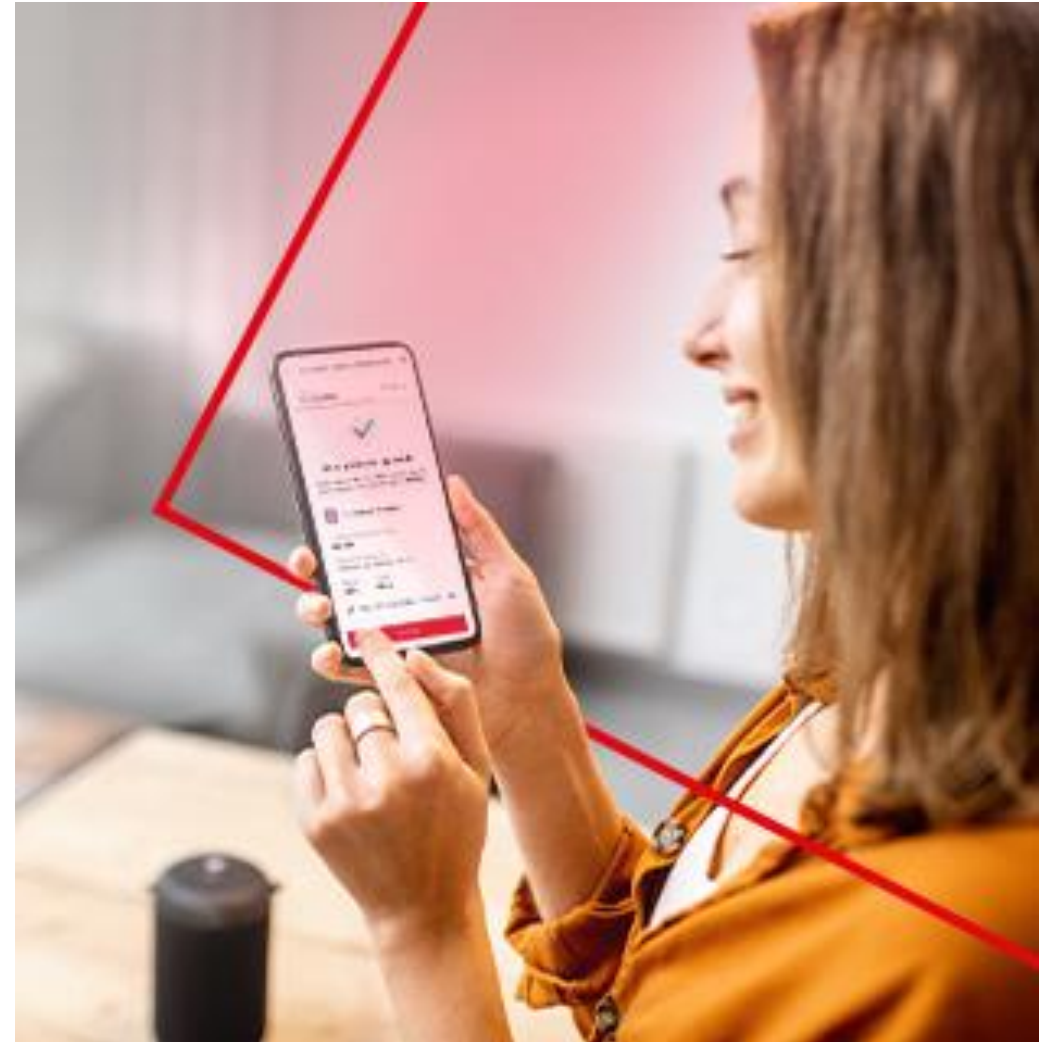

BCTT well positioned for faster technologic deployment

- **Strong digital adoption** (+50% of clients actively using digital channels)
- **Flexible architecture**, based on middleware interface, allowing for faster time-to-market

Going forward, BCTT positioned as a “fast follower” on technological adoption

- **UX/UI full overhaul**
- **Increased time-to-market of new digital features**, with 3x current capacity of “development and integration squads”

Detailed, next slide

>50%

clients already digitally engaged,
with recurrent usage

From a limited platform, focused on transactionality...

...To a complete financial services “digital hub”

- ***Focus on end-2-end sales processes***, both in credit (e.g. pre-evaluated personal loans; overdraft subscription), resources, insurances
- ***Comprehensive array of digital services***, with “zero gaps” vis-à-vis mass-market practices
- ***Intuitive UX/UI***, promoting self-learning
- ***Identitarian and consistent design***, leveraging BCTT brand (even when placing 3rd party products)

B Additionally, increased focus on “client engagement” requires commercial staff transformation, with a fully specialized and dedicated workforce...

From mostly shared workforce...

- Proven ability for account opening and transactional services
- Highly synergic value to maintain, releasing productive time of “core-specialized workforce”

...To fully specialized commercial staff, focused on relationship building

- ~200 specialized workforce (combination of internal – CTT Group – and external hires)
- Increased commercial proactivity, product knowledge and relationship building capacity

Current branches with limited privacy levels and working areas, essential to engage deeper client interactions and “fight for product penetration”

Revamped “BCTT hubs” to be launched in most productive locations...

- Increase BCTT working area, privacy levels,
- Promote self-service solutions for simple transactions, releasing commercial time

...while keeping synergic approach with CTT network

- Maintenance of low-cost, highly synergic leverage on CTT network and workforce (“secondary branches” and transaction services)

In short, a revisited scaleup strategy, underpinned on intrinsic franchise value and core platforms upgrade

BCTT franchise value is a reality

- 700,000 clients, aligned with Portuguese incumbent's client profile
- Strong potential, opportunity to increase product penetration

Going forward, our obsession will be client engagement...

- Room to position BCTT as “client's 1st bank”, leading to increased engagement
- Opportunity to establish a distinctive bancassurance platform
- Consolidation of auto-loans footprint, while renewing ambition on mortgage

...Requiring an operating model overhaul, enabling core platforms

- Close digital gap vis-à-vis peers in less than 3 years
- Increase level of specialization, investing on superior commercial proactivity and technical capability, while keeping synergic value with CTT

2025 guidance

Sizeable franchise, with increased client engagement...

825-875k clients (700-750k current accounts)

5 Bn total client's resources (x1.6 growth)

...While delivering business profitability

2025 aspiration @CMD, recordatory

To align the payments strategy in the context of e-commerce value proposition, in August, CTT acquired Payshop from Banco CTT

- CTT aims at integrating Payshop with its e-commerce strategy of becoming an Iberian e-commerce powerhouse
- Last 11 August, CTT SA acquired 100% of Payshop, a payment institution, from Banco CTT, at book-value, in an intra-group neutral transaction for CTT Group and for Banco CTT
- In terms of reporting by CTT:
 - Prior to July 2023, the “Banco CTT” business unit included (1) Banco CTT and its consolidation perimeter (321 Crédito and Payshop), and (2) CTT payments unit (part of CTT S.A.)
 - In 2023, Payshop and CTT Payments will still be reported in the “Banco CTT” business unit
 - Future reporting of CTT’s business units is to be addressed as from 1Q24

Material one-off positive impacts

Envisaged two significant positive one-offs in BCTT’s capital position:

- I. Sale of the Universo credit card exposures by YE23 (partnership termination);
- II. The capital increase within the partnership with Generali (still subject to regulatory non-opposition)

Capital expected to be retained

- Given our growth and development, the Resolution Authority has upgraded BCTT from a “liquidation strategy” to a “resolution strategy”
- BCTT will be subject to a MREL binding requirement of 23.33% (including CBR) of RWA by jun-2026 (c. 3 years to comply)
- The MREL requirement needs to be filled with loss absorption instruments, which includes capital instruments (CET1, AT1 and T2), as well as senior debt (with loss absorption capacity)
- The reinforced capital will offer flexibility in managing MREL base and composition, with less reliance in capital markets operations (no additional shareholders’ equity)

A proforma CET1 ratio clearly above 20% offers flexibility in managing future MREL requirements, without the need for additional shareholders’ equity

Return on Tangible Equity – comparable¹

%, Comparable RoTE with CMD: (i) perimeter change (Payshop); (ii) capital levels (tangible equity at 15%)

- 1 Revenue yield to increase on the back of increasing margins and commissions
- 2 Impairment levels to reduce materially with exit of credit cards (CoR 0.7-0.9%)
- 3 Cost growth with stepping up of commercial and digital capabilities (CIR <70%)
- 4 RWA: reduction with the exit of Credit Cards (c. €300m) + gradual increase (c. €300m) by business/lending growth with the regular redemption of capital relief securitizations²

Main macro assumption: benign economic environment with Euribor at ~3.0% (2025)

Business volumes and increased engagement enable growth with an improved risk profile

- ✓ **Strong execution and good tailwinds...**
 - Performance since CMD ahead of aspiration, with very strong ROTE uplift
 - Current year earnings momentum expected to continue, backed by growth and a favourable monetary environment
 - Loan book de-risking with Universo credit card exit
- ✓ **... which accommodate new investments on core operating platforms, without jeopardizing profitability commitment...**
 - Growth oriented investments, promoting franchise earning power
 - Expectation to post earnings growth and to reach higher than expected comparable ROTE
